

Īpašības

Support surfaces on the bottom
higher suction power at narrow workpieces

high suction force with small dimensions

Pieteikums platība

Handling of narrow parts and bars
Handling of parts which only have narrow and small places to grab them.

Apraksts

Robust and hard-wearing suction pad with a single, oval-shaped sealing lip. Used wherever objects (parts, packing materials, etc.) need to be lifted, transported, turned over or handled in some other manner. It is also ideal when it is necessary to handle long or flat workpieces. Due to its oval shape, it has a considerably higher suction force than round, flat suction pads when handling narrow or long workpieces. It acts as the connecting element between the vacuum generator and the workpiece.
