

Izmantošana  
Screw locking without pretreatment  
Stipriība  
High strength  
Viskozitāte  
Medium viscosity  
Iztur temperatūru  
-60 °C to +180 °C

## Apraksts

High-strength bonding of passive materials such as stainless steel or aluminium, no pre-treatment required. Thermal stability: -60 °C to +180 °C- Reduced assembly time- High strength- Handling strength: just 2 to 5 minutes- Final strength: just 2 to 4 hours- No need for pre-treatment with activator and therefore no additional emissions due to solvents
